Join us in Vienna for the **first ever Clinical OlympicsSM** to be held during IASLC! Attendees will join 1 of 3 teams to compete in a series of Clinical Events, answering challenge questions - *via iPad* - on immunotherapy in non-small cell lung cancer (NSCLC). Individual learners will earn points for their chosen country with correct responses in each event. After each team competition is completed, and at the conclusion of the overall symposium, a Team Leader Board will appear on the big screens to show comparative scores across teams as the Gold, Silver, and Bronze medals are awarded for each event and for all-around performance in the Clinical OlympicsSM.

The treatment landscape for advanced NSCLC continues to rapidly evolve with the advent of newly targetable driver mutations and an ever-expanding plethora of immunotherapeutic regimens. In this symposium, participants will join an esteemed panel to receive expert insights — in an interactive, gamified manner — on evidence-based strategies for biomarker testing, optimal selection of checkpoint inhibitor regimens, and toxicity management.
